Introduction

College students face different problems during their academic life.

A proper complaint system can make the process easier and faster.

Our project provides an online platform to submit and manage complaints.

Students can also check the status of their complaints.

Problem Statement

Manual complaint process can be time-consuming.

Students may not know the current status of a complaint.

Maintaining complaint records manually is difficult.

Students may need to visit the office repeatedly.

Proposed Solution

A simple online complaint management system.

Students can submit complaints online.

Admin can view and manage submitted complaints.

Students can track the status of their complaints.

Objectives

Make the complaint process simple.

Maintain complaints in digital form.

Allow students to track complaint status.

Make complaint management easier for the admin.

Reduce paperwork and save time.

Main Features

Student Registration & Login

Complaint Submission

Complaint Category

Complaint Status

Complaint History

Admin Dashboard

Admin Status Update

Technologies Used

HTML – Website structure

CSS – Website design

JavaScript – Basic functionality

PHP – Backend

MySQL – Database

XAMPP – Local server

Working

Student Login

Student Dashboard

Submit Complaint

Complaint Saved in Database

Admin Checks & Updates Status

Student Checks Status

Advantages & Future Scope

Advantages:

- Easy to use
- Saves time
- Digital complaint records
- Easy complaint tracking
- Reduces paperwork

Future Scope:

- Email/SMS notifications
- Complaint priority
- Mobile application
- AI-based complaint categorization

Conclusion

The College Complaint Management System provides a simple way to submit and manage complaints.

It helps students track their complaints.

It makes complaint handling easier for college administration.

The project can be improved by adding more features in the future.

Thank You
